Solutions — Embedded AI Services for Enterprise

From customer-facing conversational agents to internal workflow automation, Nexora AI delivers purpose-built solutions that integrate directly into your existing systems.

Embedded Conversational AI Agents

Natural multi-turn dialogues, natively embedded where your users already work.

Suitable Use Cases

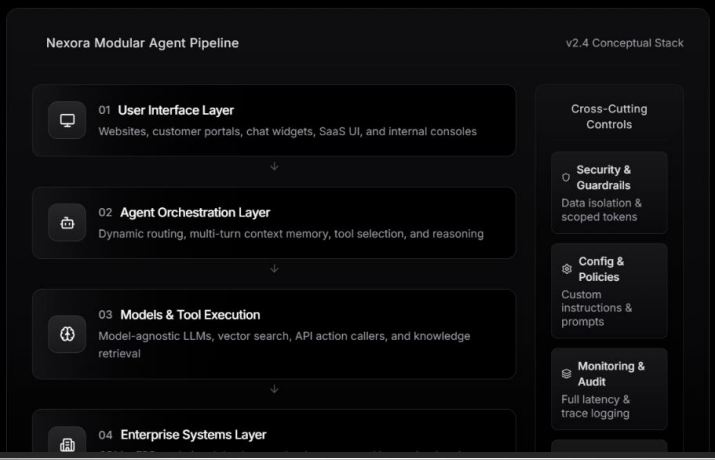

- Website visitor engagement and pre-sales queries
- In-app user guidance and onboarding assistance
- Employee self-service for HR, IT, and policy questions

System Architecture

How Embedded AI Agents Work

Nexora's platform follows a layered pipeline — starting at the user interface, moving through context-aware orchestration, down to enterprise data sources.

Technical Platform FAQ

Detailed answers to common questions regarding architecture, runtime constraints, and security.

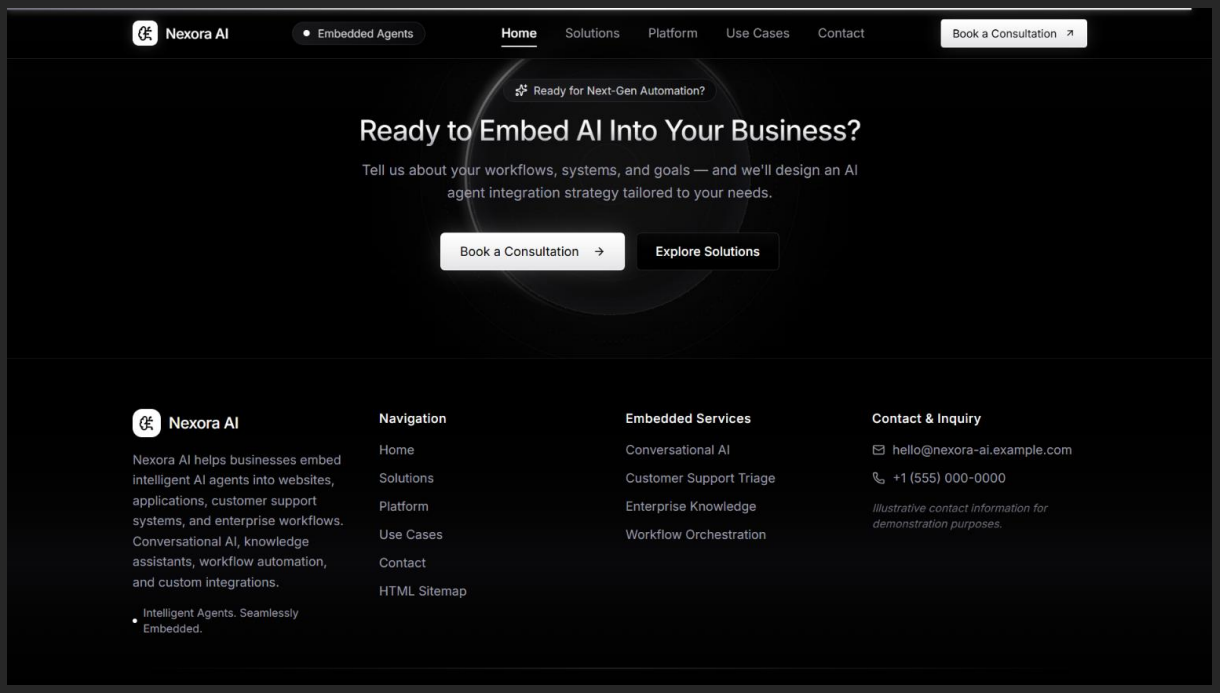

- What foundation models does the platform support?
- How do agents query real-time enterprise data?
- How is sensitive customer and employee data protected?
- What happens when an agent experiences tool timeouts or API failures?
- Is this platform a live standalone SaaS product?
